Introduction

Pybonnardel is a training for the ENAC psychotechnic named "Test Bonnardel".

What is ENAC ?

ENAC[1] is the French Civil Aviation University, located in Toulouse, France.

To become a pilot at ENAC, you have to take an exam with psychotechnics. However, it is difficult to prepare yourself without some psychotechnics samples. Thus, *Pybonnardel* will help you for this type of test. See the ENAC website for more informations about this university.

Link with ENAC

Pybonnardel is a free software under the GNU General Public License v3. It is not affiliated with ENAC. It is **independant** and for everyone, even those who do not take the special exam to become a pilot.
